Regarding the **Sales per segment**, we recognize an increase of 13,42% in the sold quantities of consumer products, which accounted for the current period to 26,2 thousand tonnes compared to 23,1 thousand tonnes in the previous year. That increase was due to the rise in the sales of consumer products by 2,95%. At the same time, even though the sold quantities of business products in the current year compared to the prior year increased by 1,30%, the sales of business products decreased by 5,81% in 2017 compared to the prior year. D. Future Performance and Development

The vision of LOULIS MILLS SA is "to be pioneers, respecting the values, tradition, humanity and environment". The continuous commitment of the Management is the fulfillment of this vision with respect and responsibility towards the family values, the human resources, the business partners and the customers

of LOULIS MILLS SA. In particular, Management's goal is the further development of the Group "LOULIS MILLS SA", in Greece and abroad, through investment and innovation, aiming in high quality products, excellent customer service and producing value for our people, partners, shareholders and society. Particularly, in the previous years, the Company has carried out significant investments in equipment and human resources, and developed its production process in order to produce products of the highest quality with respect and responsibility to the environment and the consumer.

For the next years the objectives remain high. In economic level, the Management will put all its efforts to maintain the leading position of the Company and preserve the positive results of the recent years. Specifically, the goal for the next year is to further strengthen the company's position in the market by securing its existing market shares and also increasing them, to develop new products, to provide its customers with excellent services and high quality products, to enhance the value being created for the shareholders, to develop its personnel, to attract competent and skilled personnel and finally, to make its working environment one of the best in Greece.

In addition, the purpose of the Management for 2018 is both to achieve the business objectives and lay the foundations for the Group's strategy implementation, emphasizing on the further development of the markets of mixtures and raw materials for bakery and pastry and in the effective use of synergies within the Group so as to better control the operating expenses.

Main keystones and actions for the future years:

- Securing and maintaining its leading position in the market for flour and further growing in the market of mixtures.
- Growing in foreign markets.
- Development of new products.
- Determination of the pillars and action plan for Human Resources.
- Maintaining the high quality of production and continuation of the upgrading of the quality of management and control systems.
- Focusing on sustainable development issues.

The foreseen performance for 2018 depends to a great extent on the increased uncertainty and volatility in the local market, yet the strong capital structure of the Group, combined with its well-operating and organizational structures, gives Management the ability to manage effectively any difficulties, which are likely to arise and continue uninterruptedly the implementation of its strategic plan.

E. Main risks and uncertainties for the next year

The main risks that the Group is exposed to and is likely to face next year are as follows:

Macroeconomic environment and risks from the imposition of capital controls in Greece

The macroeconomic and financial environment in Greece seems to appear signs of stability however uncertainty continues to exist. The imposition of capital controls in Greece, by Decree Law, on 28th June 2015 affected initially the liquidity of the financial system and the collection of receivables, asset impairment, revenue recognition, serving its existing debt liabilities and/or to satisfy the loan terms and the relevant financial ratios, recoverability of deferred tax benefits, valuation of their financial instruments, the adequacy of predictions and the continued unrestricted business activity. However, that situation has normalized to a great extent since the initially imposed restrictions have been considerably mitigated.

In the context of that uncertain economic environment the Management constantly evaluates the conditions and potential future impacts, in order to ensure that all necessary actions and initiatives for minimizing any impact on the domestic activities of the Group have been taken. However, Management is not able to predict precisely the possible developments in the Greek economy and their effect on the Group's

activities. Despite this, based on the Management's estimation and assuming that capital controls would be lifted over the medium to longer term and that the agreed terms and conditions of the third rescue program will be implemented, no significant negative impact is expected in the activities of the Group in Greece. Therefore, the Management has concluded that no additional impairment provisions of financial and non-financial assets of the Group are needed at December 31, 2017.

Credit Risk

The Group does not have a significant concentration of credit risk in any of its contracting parties, mainly due to the large number of customers and the great dispersion of the Group's customer base.

The Management of the Group has adopted and applies credit control procedures to minimize its doubtful receivables through the evaluation of the credit ability of its customers and the effective management of the receivables before they become overdue. For the monitoring of credit risk, customers are classified according to their credit profile, the maturity of their receivables and the historical background of their collection.

Additionally, the Group's companies have an insurance contract that covers most of their claims. This contract cannot be sold or transferred. Customers considered to be unreliable are reevaluated at every reporting date and when a likelihood of non-recovery of these receivables occurs, a provision for doubtful debts is formed.

Liquidity Risk

The Group keeps its liquidity risk at low levels through the availability of adequate cash or/and approved bank credit limits ensuring the fulfillment of the Group's short-term financial liabilities. The Group's liquidity ratio (current assets to current liabilities) amounted to 2,68 at December 31, 2017 towards 1,22 for the previous year.

For the monitoring and management of liquidity risk the Group forms cash flow projections on a regular basis.

Interest Rate Risk

The Group's exposure to the risk of changes in the interest rates relates to its short-term and long-term loans. The Group manages Interest Rate Risk through keeping the total of its loans at variable interest rates. Since the Company's loans are linked with the Euribor index, the maintenance of the latter at low levels has a direct positive impact on the financial cost of the Group.

The table below presents the sensitivity of the Earnings Before Tax of the Group and the Company if the interest rates change by a percentage point:

| Sensitivity analysis on interest rate changes | | | |
|--|---------------------------------|--------------------------------|------------------------------|
| | Interest Rate Volatility | Impact on Company's EBT | Impact on Group's EBT |
| Amounts 2017 | 1,00% | -390.614 | -417.579 |
| | -1,00% | 390.614 | 417.579 |
| Amounts 2016 | 1,00% | -322.757 | -342.680 |
| | -1,00% | 322.757 | 342.680 |

Exchange Rate Risk

The Group operates in Southeast Europe and as a result any change in the operating currencies of those countries towards the other currencies exposes the Group to risk of exchange rate. The main currencies involved in the Group's transactions are Euro and Bulgarian Lev.

The Group's Management continuously monitors the foreign exchange risks that may arise and assesses the need for action, yet at the moment there is no such risk since the exchange rate between the two currencies is stable from 1 January 1999 (BGN 1.95583 = EUR 1).

Risk of Inventory Loss

The Management of the Group takes all the necessary measures (insurance, storage) in order to minimize the risk and the contingent loss due to inventory loss from natural disasters, thefts, etc. Moreover, due to the inventory's high turnover ratio and the simultaneous inventory's long duration (expiry date), the risk of their obsolescence is very limited.

Decrease in demand due to the general consumer recession

The Group operates in the food industry and the demand within that industry remains at the moment comparatively stable and strong despite the overall consumer recession which does not seem to greatly recover.

In any case, with a view to the general conditions, the endurance and the intensity of the economic crisis, that risk is expected to affect the Group's performance since the decline in demand is expected to continue, as long as the general conditions of the economic recession continue with the same intensity. In the light of the above, that risk is considered as significant since it is expected to affect the Group's performance and results.

Risk of increase in the price of raw materials

The fluctuation in prices of both imported and local raw materials for the last five years as well as the general economic crisis lead us to the conclusion that this fluctuation will continue to exist. Therefore, exposure to that risk is considered high and for that reason the Group's Management takes all the necessary measures in order, firstly, to limit the Group's exposure to that risk through achieving appropriate agreements with its suppliers as well as the use of derivative financial instruments and secondly, to quickly adjust its pricing and commercial policy.
